

WIPPERMANN

Special chains

Roller chains with attachments for comprehensive transport and handling applications

Accumulator chains with AFS clips
Application: Automotive and assembly technology

Roller chain with extended pins on one side
Application: Materials handling

Roller chain nickel-plated with plastic rollers
Application: Electrical industry

Triplex power and accumulator chain nickel-plated
Application: Materials handling,
Conveyance and accumulating of bulk goods

Hoisting chain as a substitute for rack and pinion drives
Application: Car parking systems

Special chain as combination of leaf chain (support)
and roller chain (drive)
Application: Materials handling

Roller chain with special outer plates to house cylindrical parts

Application: Materials handling

Roller chain with extended pins on one side and double cut-ins in special dimensions

Application: Materials handling

Roller chain with alternately mounted inner and outer plates as attachments

Application: Materials handling

Roller chain with laser-cut outer plates

Application: Paper industry

Pusher dog chains with POM clips for the gentle transport of sensitive goods

Application: Packaging industry

Roller chain with laser-cut outer plates

Application: Packaging industry

Roller chain with laser-cut, slightly grinded outer plates
Application: Timber industry

Roller chain with integrated functional component
Application: Equipment technology

Roller chain with mounted special rollers, electrically conducting
Application: Electrical industry

Top plate conveyor chains for connecting of machine tools and assembly systems
Application: Automotive and electrical industry

Roller chain stainless steel with straight and bent inner and outer attachments on one side
Application: Materials handling

Roller chain stainless steel with bent or straight attachments on one side with pins
Application: Materials handling

Double strand roller chain with bent attachments on two sides and profiles riveted on

Application: Pallet conveyor

Marathon roller chain maintenance-free with offset and extended pins on one side

Application: Materials handling

Roller chain nickel-plated with bent attachments on one side at inner and outer link

Application: Materials handling

Roller chain with straight plates and welded attachments and cotter pins on one side

Application: Materials handling

Roller chain with extended pins and functional components with rollers on one side

Application: Materials handling / Glass industry

Roller chain with extended pins on one side and special bent attachments

Application: Food industry

Duplex roller chain galvanized yellow chromated with alternating special attachment pins

Application: Hoisting systems

Roller chain with extended cotter pins on one side and special outer link

Application: Printing industry

Special chain with nickel-plated pins and plates, wide plastic rollers and special attachments

Application: Printing industry

Roller chain stainless steel with clamp plates

Application: Packaging industry

Duplex roller chain with bent attachments and revolving support rollers as well as grinded special attachments

Application: Packaging industry / Foil transport

Roller chain with extended cotter pins on one side to house functional components

Application: Agricultural technology

Roller chain with straight plates and plastic clips with elastomer support

Application: Careful conveying of sensitive goods

Roller chain push clamps which dip from top down under load (load level variably configurable)

Application: Natural stone machining

Triplex roller chains with push clamps, which dip from top down under load (adjustable load level)

Application: Storage system

Duplex Marathon roller chain with straight plates and plastic clips

Application: Careful conveying of sensitive goods

Roller chains with rocker arm and straight attachment

Application: Instant coffee packaging equipment

Roller chain with reinforced rocker arm attachment

Application: Furniture industry

Roller chain with extended special pins
Application: Materials handling

Roller chain with plastic sliding plates to gently transport load bearing systems
Application: Automotive industry

Roller chain with special plates to house die tool carriers
Application: Machining

Roller chain with special outer link
Application: Printing industry

Roller chain with special pins and ball casters for paternoster cabinets
Application: Chemical industry

Roller chain with double pitch plates and hollow pins
Application: Electroplating

Roller chain with plastic inner links and special clips
Application: Packaging industry

Roller chain with bent attachments and fitted rollers for paternoster cabinets
Application: Electrical industry

Roller chain with special attachments and sliding parts
Application: Clothing industry

Leaf chain zinc aluminium flake coated with wire rope and plate end link
Application: Domestic technique

Roller chain with alternately mounted supporting brackets
Application: Furnace construction

Roller chain with lateral support rollers and bent attachments
Application: Materials handling

Roller chain suitable for curved paths with different attachments

Sprocket with extended hub

Sprocket with milled in switching boxes

Special plate sprocket

Sprocket with inductively hardened toothings, special hub and tapped bore

Chain coupling for the elastic transfer of torques
Application: Drive technology

ATC magazine chain 340 with nickel-plated pots to house tools

Application: Production technology

ATC magazine chain 320 with nickel-plated pots to house tools

Application: Production technology

Sprocket-chain system: a combination of simplex design and double pitch roller chains

Application: Hoisting chain for autoclaves

Special sprocket with inner toothed hub

Duplex sprocket to house flange with mounting bores

Duplex sprocket with tolerated bore
